Netzsch will exhibit an upgraded ChocoEasy 50—a

compact, fully automated system that yields 100 percent repeatable batches of chocolate, compounds or fillers made from a confectioner's unique, personal recipe. New features include a

**ChocoEasy 50**

touchscreen control panel for easy operation, pressurized mechanical seal for higher reliability, infrared thermometer for accurate temperature readings and separated electronics to install away from equipment for a smaller footprint and safer kitchen environment. The closed system design prevents contamination, reduces energy costs by 35 percent, and preserves reproducibility and process control standards.
