

Nano Dispersions - for Pharmaceutical Applications

NETZSCH

NETZSCH a global leader in the manufacture of grinding and dispersion equipment presents the latest in pharmaceutical dispersion technology the **Delta Vita** range of horizontal agitator bead mills. With all product contact wear parts of Zirconium Oxide and the ability to handle Zirconium Oxide beads 0.05mm in diameter the Delta Vita range provides the best method to create dispersion of active ingredients with particle sizes in the true nanometer range.
