

NETZSCH

Proven Excellence.■

The owner-managed NETZSCH Group is a leading global technology company specializing in mechanical, plant and instrument engineering. Under the management of Erich NETZSCH B.V. & Co. Holding KG, the company consists of the three business units Analyzing & Testing, Grinding & Dispersing and Pumps & Systems, which are geared towards specific industries and products. They attach great importance to product development within the framework of an innovation ecosystem.

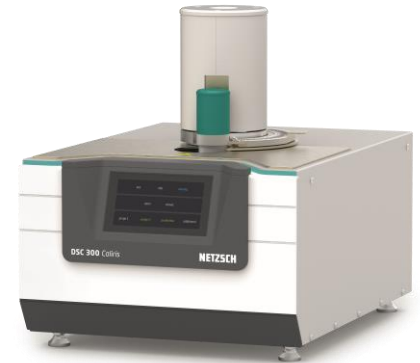

This group structure enables decentralized corporate management in which the business units can react agilely to market changes and the holding company acts as a strategic architect. In addition, NETZSCH Business Service GmbH provides support as an internal service provider and NEDGEX as an incubator for digital innovations. With over 4,600 employees in more than 200 global production, sales and service companies, the NETZSCH Group has been offering its customers proximity and competent service for over 150 years.

Analyzing & Testing

Wielding over 60 years of experience, NETZSCH Analyzing & Testing provides top-of-the-line customized solutions in thermal analysis, rheology, the determination of thermophysical properties, and fire testing. Our representative offices around the globe, along with our large subsidiaries in China, Japan, the USA, and Korea, allow us to deliver our unparalleled service and support to customers in academia, industry, and materials testing worldwide.

Used in the fields of polymers, life sciences, energy solutions and electronics – as well as in high-temperature applications such as glass, ceramics, metals, alloys, building materials and inorganics – the instrumentation in our comprehensive portfolio is developed and manufactured in-house, in deliberate collaboration with our customers to ensure their utmost satisfaction. Technical excellence, innovative technology, uncompromising quality standards and first-rate software make us to one of the world's leading manufacturers in our trade, with exceptional service offerings rounding out our unsurpassed reputation.

Grinding & Dispersing

The Grinding & Dispersing Business Unit, one of three business units of the global NETZSCH Group, offers a comprehensive program for the many challenges in mechanical process engineering. Here the Business Unit is primarily involved in the areas of wet and dry grinding, mixing, dispersing, de-aeration and classifying. The laboratory- and production-scale machines, as well as complete production lines, are used in almost all areas of industry, such as the forward-looking nanotechnology, the production of ink, minerals or foods.

The bundling of processing know-how, our extensive machine program, solutions for customer-specific problems and our global presence are unique and hence the strength of the business unit.

Our performance standards are high. We promise our customers Proven Excellence – exceptional performance in everything we do, proven time and again since 1873.

Pumps & Systems

As a global specialist in complex fluid management, customer satisfaction is the top priority at NETZSCH Pumps & Systems. We have developed, produced and distributed customised and sophisticated pump solutions for over seven decades. With our NEMO® progressing cavity pumps, TORNADO® rotary lobe pumps, NOTOS® multi screw pumps, PERIPRO® peristaltic pumps, grinders, dosing technology and accessories, we offer innovative solutions on a global scale, from the smallest dosing pump for the industry to large pumps for the oil and gas sector or mining. Even the most demanding media pose no problems for our product portfolio. With approximately 2,500 employees, NETZSCH Pumps & Systems is the largest business unit of the NETZSCH Group, along with NETZSCH Analyzing & Testing and NETZSCH Grinding & Dispersing. Our performance standards are high. We promise our customers Proven Excellence - exceptional performance in everything we do, proven time and again since 1873.

NEDGEX, as part of the NETZSCH Group in Selb, plays a pivotal role in the company's innovation strategy by identifying opportunities and driving technological advancements across various domains.

As the corporate venture unit of the NETZSCH Group, NEDGEX specializes in identifying and developing innovations with the potential to revolutionize the group's business sectors. By combining internal expertise with external partnerships, NEDGEX aims to advance cutting-edge technologies and business models that contribute to securing long-term success.

Founded in 2021, sensXPERT is a technology brand of NETZSCH Process Intelligence GmbH, a corporate venture of the NETZSCH Group. sensXPERT provides data-driven manufacturing solutions that help customers in the plastics processing industry increase their productivity in real time.

The company combines advanced measurement hardware and material science with the artificial intelligence of machine learning software to characterize material behavior in sync with the machine and cavity, increasing process efficiency, reliable reproducibility and consistent product quality by detecting, evaluating and controlling all critical influencing factors. The intelligent technology supports all major thermoset and thermoplastic processing techniques.

Headquartered in Selb, Germany, sensXPERT builds on over 50 years of materials expertise and experience in sensor technology and is supported by a group-wide talent pool of more than 4,000 employees.

LabV Intelligent Solutions GmbH, a subsidiary of the NETZSCH Group based in Munich, is dedicated to digitalization in product development and quality assurance. With the mission to drive the development of more efficient and sustainable materials, the company supports R&D and quality engineers with the LabV® material intelligence platform to efficiently design the entire product cycle from idea to production. The platform eliminates inefficient data processing and management and provides targeted insights from relevant data to make data-based decisions. LabV's customers include well-known companies from the polymer processing, mechanical engineering and paint and coatings industries, among others.

If journalists have any questions about the company, products or publications, NETZSCH Corporate Communications will be happy to answer them.
We look forward to your inquiry.
